

NUTRITIONAL FACTS

Active Ingredients per 2 Scoops	
L-Leucine	7182 mg
L-Valine	4309 mg
L-Isoleucine	2887 mg
L-Glutamine	2873 mg

Dosage:
Pony: 1 measuring scoop a day
Horse: 2 measuring scoop a day
1 measuring scoop is equal to approximately 12.5 gm.
Before a competition the dosage can be doubled for 4 days

Benefits

- » Aids to maintain muscle tissue mass, required in times of physical stress and intense exercise.
- » Supplementation following exercise aids to replace muscle tissue damage and wastage by optimizing muscle repair and regeneration.
- » Pre-exercise supplementation considerably reduces muscle protein degradation during exercise.
- » Post-exercise supplementation aids muscle recovery following intense exercise stress.
- » Maintains cell integrity during hard work and Preserves muscle glycogen stores.

NUTRITIONAL FACTS	
Active Ingredients per 10 gm	
Biotin	20 mg
Excipient	Q.S.

Dosage:
Horse: 10 gm per day

- Benefits
- » Biotin supports the production of keratin which is the most important structural protein in hooves. Biotin supplementation helps horses have optimal levels of keratin in their hooves, hair, and connective tissue, which supports their structural integrity and growth.
 - » Feeding supplemental biotin is recommended for horses with dry, cracked or brittle hooves, horses that pull shoes often or horses with chronic laminitis. Horses that are recovering from laminitis or seedy toe might benefit from biotin to speed up hoof growth and quality.

NUTRITIONAL FACTS

Active Ingredients per 15 gm	
Glucosamine	7000 mg
Chondroitin	1250 mg
MSM	5000 mg
Hyaluronic Acid	100 mg
Excipients	Q.S.

Dosage:
Pony: 1 measuring scoop a day
Horse: 2 measuring scoop a day
1 measuring scoop is equal to approximately 15 gm.
Safe for Competition

Benefits

- » Glucosamine and chondroitin supplements help reduce chronic inflammation.
- » Hyaluronic acid serve as lubricating molecules that promote smooth, frictionless motion in joint.
- » Hyaluronic acid has chondro-protective and joint preserving effects on LPS-induced synovitis in horses.
- » Chondroitin Supports cartilage production and slows breakdown.
